Feature Rental Texture Tool
Wood Plank Stamp

Capture the realistic look of heavy wood plank flooring in durable concrete with the **Wood Plank** texture stamp pattern.

The 8" wide planks have a deep, attractive texture that responds well to accent color release giving contractors the option of creating a worn, aged wood floor. This pattern allows outdoor furniture to sit solidly without rocking on the textured surface. In the right setting, the **Wood Plank** pattern is a terrific choice for property owners and contractors alike.

Make this texture pattern part of your future decorative presentations. You'll be pleased with the results!

New!!! Proline Textured Edge Liners

Proline, a leader in texture stamps and seamless skins, now offers an attractive series of edge liners designed for steps, pools, countertops, and wall caps. Choose from four dramatic textures that are sure to grab the attention of your customers.

Denali is the most rugged and aggressive texture. It is offered in flat, hammered edge, and bull nose profiles. The **Yukon** liner creates a strong texture, but not as concentrated as the Denali. It is available in flat and bull nose profiles. The classic look of **Roman Slate** texture is Proline's most popular and is available in flat, hammered edge, and bull nose profiles. **Yosemite** captures the popular texture from Old Granite

without the deep cleft stone vein. You can get it in flat and hammered edge profiles.

These **reusable** edge liners are manufactured from the same material used to produce Proline's seamless texture skins and can be cut to length with a skill saw. They are usually held in place with drywall screws. More experienced contractors often hold them in place by hand. These liners are available in 2", 3-1/2", 5-1/2", and 7-1/2" heights to match dimensional lumber and are 8' in length.

Trying to imprint step faces after stripping forms is always an iffy proposition. Try the Proline liners and give your stamp jobs the finishing touch your customers will appreciate.
