

TINTE' D ACQUA™

Tinte' D Acqua™ stains are penetrating, water base stains that produce unique color effects in finished cementitious surfaces that simulate the natural shadings and aged appearance of stone or masonry.

- The color effect is unique to each stained surface and cannot be duplicated with other materials.
- Contains no acids or harmful chemicals and works as an alternative to typical reactive acid stains.
- 28 standard colors.
- Can be used vertically or horizontally on concrete, masonry, overlays, artificial rock displays, water features and themed finishes.

18-WBS10	Patina Stain, 1-Gal.
18-WBS11	Terra Stain, 1-Gal.
