

Slim Strip Step Liners

Use Brickform's Slim Strip Step Liners to add exciting and attractive texture to step risers and stoop facings. Eliminate the brushed finish appearance common on most stamp step jobs and provide your customers with a fully-textured project you and they will be proud of.

Slim Strip Step Liners can be held to the form face with drywall screws and are durable enough for many reuses. They are manufactured in nominal 4", 6" and 8" heights to ***match*** your forming lumber. Slim Strip is available in stone and slate texture to compliment any stamp project.
